

High performance. Delivered.

Junior Windows administrator (intern)

Be greater than

Look around - is your life comfortable?

Take a chance with your life, shake it up, make a change that matters and helps you grab onto a new journey, and let's change things globally, together!

Why Accenture

By joining Accenture, you will be a part of a global company with a world-class brand and reputation.

You'll get endless opportunities to challenge yourself with interesting work in a consulting environment.

Environment that encourages employees to learn, develop and achieve a wide range of skills and knowledge spanning the customer services.

Career opportunities and training in our growing company

What you will do

- Manage systems administration activities, centered around Windows Server; including User Accounts and Security, Connectivity settings, Hardware components, Devices/Drivers, and Restore/Backup procedures;
- Install new software and manage software updates;
- Receive, Troubleshoot, and Respond to technical issues, including problems with connectivity (LAN, Wireless, Remote VPN), network (shared file server, printers), and general computer malfunction.

We expect

- Experience in Server administration in Microsoft (MS) Windows environments;
- Participating in the administration of Active Directory, DNS, DHCP services;
- Ability to work both individually and in team groups all consistent with the organizational goals;
- Patch testing, deployment and maintenance activities, maintaining documentation regarding system configuration and operation.
